1 ProForecast offer 8 revenue models that all work in different ways. The models are used to reflect a businesses revenue streams. You can combine different models to create a particular type of revenue stream to suit the business. Each revenue model will work in specific ways, when selecting a revenue model you will be prompted with a brief overview of what the model includes so that you can make the appropriate selection. Data can be entered for the revenue models within the **"Data Entries"** page once they are added to the plan in this section.

To add a revenue model to the plan, 2 select which model you wish to use from the drop down list then 3 click the tick icon which will save the revenue model to the plan.

4 If you would like to remove a revenue model from the plan then select the trash icon beside the model.
